- 1. Harmachis Temple of Chephren at Giza. Ground-plan of the building remains. Scale of 1 to 150.**
- 2. East façade of the temple, core wall masonry and reconstruction. Scale of 1 to 150.**
- 3. West side of the temple, core masonry and north-south section. Scale of 1 to 150.**
- 4. South side of the temple, core masonry and east-west section. Scale of 1 to 150.**

Frontispiece:

Above: Aerial view of the pyramid field of Giza. At the bottom end of the Chephren Causeway lie the Valley Temple, the Harmachis Temple, and the Sphinx. Next to it is the Temple of Amenophis II, in front of the southern face of the Cheops Pyramid stands the workshop for the Conservation and Construction of the Great Cheops Boat. Scale of 1 to 12,500.

Below: The Valley Temple, the Harmachis Temple and the Sphinx of Chephren. Parts of the protective walls around the Sphinx Terrace are still retained, to the east of the Harmachis Temple is a modern supporting wall. The Harmachis Temple has not been fully excavated yet. Scale of 1 to 1,900.

Plates:
